Teaching & Learning Fair Presentation  
Abstract 2017-218  
Friday, June 2, 2017  
1:50 PM  
Room: Sopris

TimeToast is a web-based platform that allows users to create interactive timelines available to all. This is particularly useful in settings that cover significant events over a period of time such as historical aspects of the sport business industry. Videos and links can be embedded along with other written content.
