Teaching & Learning Fair Presentation Abstract 2020-318 Session: Teaching & Learning Fair II

Students will select a fictional media source where socio-cultural issues in sport are shown. They will be asked to demonstrate their knowledge of the subject area being portrayed (race, gender, deviance, violence, etc.) and discuss how it is being portrayed through the fictional media. This paper involves research into the dimension being discussed, a description of the example and a critique of the portrayal. You will integrate material from outside sources, the textbook, and the in class lectures to support your writing. Each paper will need to be 3-4 pages.
